This is the first office action for application number 10/748,268, Adjustment Apparatus Capable of Remembering Screen Viewing Angle, filed on December 31, 2003.

***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bruce Troxell on August 18, 2005.

The application has been amended as follows:

In claim 1, line 11, --upon opening and closing the lid-- has been inserted after "angle".

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: the primary reasons for the allowance of the claims in this application are the limitations of an adjustment apparatus having memory of a screen viewing angle including a lid having a screen and an adjustment device having a screw bar and an adjustment wheel for driving the screw bar such that bucking position of a head end of the screw bar against an action zone of the lid changes thereby to control a swinging angle of the lid to adjust and remember the viewing angle upon opening and closing the lid, now included in independent claim 1 and in combination with the other elements recited in the claim, which is not found in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
